

Rohit Manora

Senior Experience Engineer

publicis
sapient

SUMMARY

Rohit Manora is a **Senior Experience Engineer at Publicis Sapient**, based in the Gurgaon office. Since joining Publicis Sapient in August 2021, he has contributed to multiple projects across diverse technology landscapes and has gained comprehensive experience throughout the **software development lifecycle**, including solution design, architecture, development, integration, implementation, testing, and application maintenance.

Rohit brings strong expertise in designing and delivering **scalable, data-driven, object-oriented, microservice-based, and service-oriented enterprise applications**. He has extensive experience working with cross-functional stakeholders and distributed onshore and offshore teams, contributing to effective delivery, process optimization, technical problem-solving, and the development of high-performing engineering teams across multiple business domains.

His professional experience spans the **Financial Services and E-commerce domains**, where he has contributed to enterprise-grade digital platforms and customer-facing applications. In recent years, his focus has been on **frontend engineering and modern web application development**, with hands-on expertise in **React.js, Next.js, Adobe Experience Manager (AEM), Microfrontend Architecture, GraphQL, REST APIs, Storybook, and modern web technologies**.

Rohit has played a key role in **AEM-based digital transformation initiatives**, developing scalable, reusable, and high-performance digital experiences. His work focuses on building maintainable frontend architectures, integrating enterprise content management solutions, optimizing application performance, and delivering seamless and personalized customer experiences across web and mobile platforms.

He holds a **bachelor's degree in computer engineering from SGSITS, Indore, affiliated with RGPV University**.

SKILLS

ReactJS, NextJS, JavaScript, TypeScript, HTML5, CSS3, SASS, Redux, TailwindCSS, Microservices, Adobe AEM, Webpack, Storybook, NodeJs, Angular9, RxJs, AWS, Docker, Git, GitLab, CI/CD

WORK EXPERIENCE

Publicis Sapient

Aug 2021 to Present

CARNIVAL PLC CUNARD AND P&O -Mar24-AUG26

Engineer

Description:

The **Carnival UK Digital Transformation Project** focuses on modernizing the **Cunard and P&O Cruises** digital platforms using modern web technologies to deliver a fast, scalable, personalized experience that drives direct cruise bookings.

The solution follows a **Microfrontend (MFE) architecture**, enabling independent and reusable modules such as **Cruise, Basket, Checkout, Check-in, Personal, Product, Payments, and Events**. Shared UI components are developed and maintained using **Storybook** for cross-brand reuse and consistency.

Adobe Experience Manager (AEM) is used for enterprise content management across traditional, headless, and **Edge Delivery Services** architectures. **AEM Universal Editor** enables intuitive inline content authoring directly within the preview experience, improving authoring efficiency. The platform integrates with backend services through **GraphQL and REST APIs**, with dynamic **i18n labels and page-level configurations** based on country, page, and style ID.

Role & Responsibilities / Key Achievements:

Rohit's role was to Be Maintaining frontend part for both the brand **Cunard and P&O Cruises**.

Some of the project development responsibilities are as follows:-

- Developed and maintained responsive UI components using **ReactJS and Tailwind CSS**.
- Developed and consumed reusable **Storybook UI components** across Microfrontends.
- Worked on **AEM integration**, content management, i18n, and page-level configurations.
- Implemented features and supported the migration of **Cunard and P&O Cruises** platforms worked on multiple MFEs
- Performed **unit testing**, code reviews, Git branch management, and CI/CD and jenkins activities.
